What is the state of Lacanian psychoanalytic technique today? Our daylong study day will take up this question with theoretical presentations, cases, and discussion. We'll consider the theory and practice of handling of cases and the direction of the treatment. We'll consider how Lacan's views of technique changed throughout his career and how technique within the Lacanian framework has changed since his death. Our event will end with an open discussion involving participants and attendees. Open to clinicians and the general public, our clinical study day will prove of value to anyone who takes an interest in psychoanalysis.

Registration fee: Can\$100, lunch included.
